

Junior Operations/Development Engineer Job Specification

7 April 2014

BSG Wireless

Wasing Pavilion, Wasing Lane, Aldermaston, Berkshire, RG7 4LY | Tel: 01189 711 750

General Description

Position: Junior Operations/Development Engineer

Reports to: Operations Manager

Location: Aldermaston, Berkshire

Qualifications: Relevant degree, qualifications or experience

Salary: Competitive package according to experience

BSG Wireless builds software across multiple platforms including Android, Blackberry, iOS, Web and Windows, and is currently looking for a Junior Operations/Development Engineer to join our highly focused IT Operations team at the Aldermaston office.

Job Role

To assist with the management, maintenance, administration and development of the company's existing IT infrastructure and products. The role is within the IT Operations department but will also involve interaction with the Development department in assistance with App development.

Specialist & Technical Knowledge

This is an interesting role including interaction with both the IT Operations and Development departments. It is possible this role could be filled by a person with some experience in IT Operations who also has some experience with App development (perhaps in a hobbyist capacity), or by a person with App development experience who also has some level of server administration experience, again possibly in a hobbyist capacity.

Main Accountabilities

- Linux Administration
- Administering hosting centres
- Service status reporting, review meetings with customers
- Overall support of production and development environments
- Development of core products

Essential Attributes

- Basic knowledge of IT hardware and software applications, OR basic App development
- Good interpersonal and written skills
- Detailed and methodical approach
- Flexibility in approach
- Tenacity and persistence
- Enthusiastic learner
- Team approach with a willingness to get things done

Desirable Attributes

- Linux / Windows / Mac operating systems experience
- TCP/IP networking technologies
- Motivation and ambition
- Own transport with full UK driving license

If you would like to be considered for the role then please send your CV along with your contact details to careers@bsgwireless.com.
